

SPECIALITY DRESSINGS

V.A.C. GranuFoam Silver® Dressing Kit

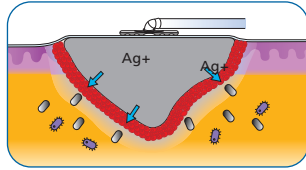

Better wound care in a single package

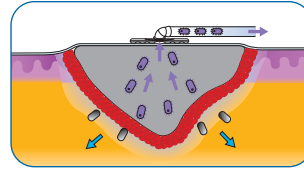

Better Wound Care

EFFECTIVE THERAPY

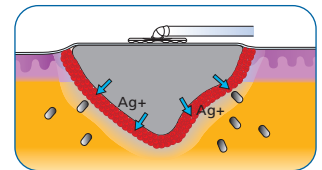

V.A.C. GranuFoam Silver® offers all the benefits of Negative Pressure Wound Therapy plus rapid and effective microbial kill.¹

Continuous delivery of active silver ions from micro-bonded metallic silver, which is evenly distributed throughout the dressing.

Eliminated micro-organisms are removed with the wound fluid. The T.R.A.C.® Technology provides more effective therapy as target sub-atmospheric pressure is monitored and maintained at the wound site.

Continuous delivery of silver directly to the wound bed even after sizing.

CLINICAL EVIDENCE

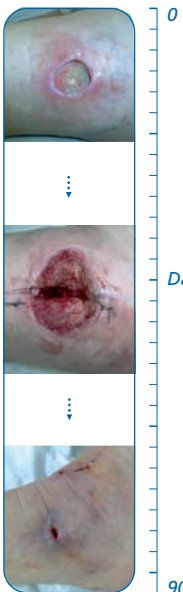

A growing body of published and peer-reviewed clinical evidence demonstrates the efficacy of V.A.C.® Therapy.

PROVEN OUTCOMES

The scientific proof of the effectiveness of V.A.C.® Therapy is validated by the daily experience of healthcare professionals.

Pressure Ulcers Case Study:

Chronic, non healing ulcer with deep tissue infection.

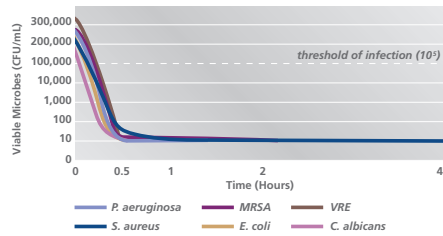

Day 20 of V.A.C.® Therapy with V.A.C. GranuFoam Silver® Dressings.

3 month follow-up post V.A.C.® Therapy with V.A.C. GranuFoam Silver® Dressings.

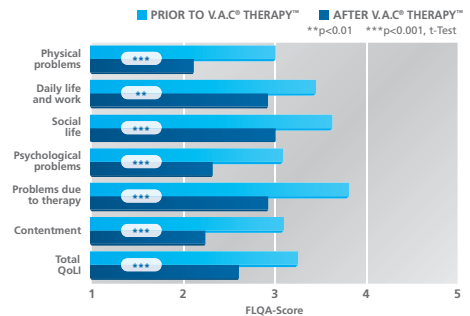

Fast

99% of pathogens eliminated within the first 30 minutes.¹

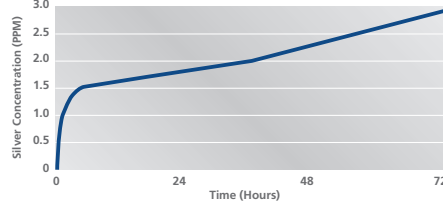

Improved quality of life³

Effective

Provides a controlled, sustained release of silver ions.²

¹ Representative microbial in-vitro test data; KCI internal data on file.
² Data for 72 hours only. Routine dressing changes are recommended every 48 hours, KCI internal data on file.
